

Canadian Performance Examination in Dental Hygiene Record of Deposits for Actual Client

Station #: _____

CPEDH Evaluation Date: _____

Rater ID # and Signature: _____

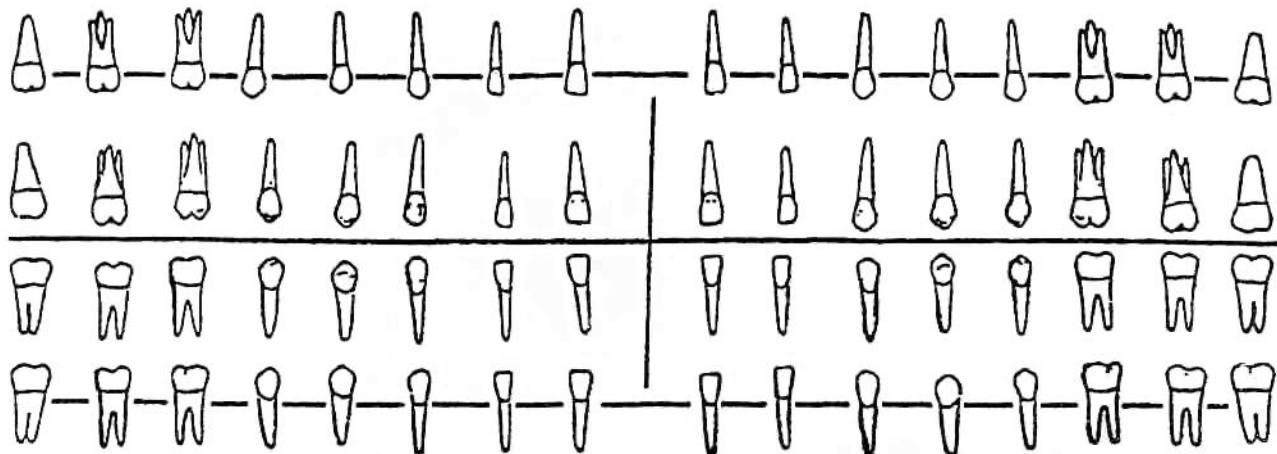

Client Name: _____

Raters: Complete the following:

- Assign 3–4 teeth in one quadrant, must have 1 molar, 1 premolar and 1 anterior.
 - Document the assigned teeth on the Candidate's *Clinical Care Notes With Tooth Debridement Assignment* form AND also in required sections of this form.
- Indicate the pre-debridement supra and subgingival calculus on odontogram: place a dot on the surface the calculus is found. Place the dot above the line for supragingival calculus and below the line for subgingival calculus.
- Following candidate station completion, do a preliminary assessment of the tissue and note the tissue condition in the mouth. Document any tissue trauma (including location and severity) on the appropriate candidate's GRS form
- At the assigned time, assess all the quadrants completed by the candidates who rotated through your station. Transfer the relevant information onto your GRS form for each candidate.
